

Qatar Rail Safety Policy

The Railway is one of the safest modes of transport.

Qatar Rail's Safety Policy provides our goals and basic principles to ensure a safe operation.

OUR GOALS

- Zero Harm to our customers, employees, assets, environment and our contractors.
- Identify health & safety risks to eliminate or to effectively manage them.
- Continual health & safety improvement in all activities within Qatar Rail and our contractors.

BASIC PRINCIPLES

We will create, operate and maintain a railway where:

- Open communication and trust will foster a positive safety culture throughout the organization.
- Every journey is a safe journey.
- Everyone goes home safe every day.
- All injuries are preventable.
- If it is not safe don't do it.
- We are all responsible for safety. We all need to look out for each other.
- We all have a duty to follow our rules and procedures. Do not take shortcuts.
- All incidents and near misses are reported and documented so we can learn from the past.
- We set health and safety objectives and targets as part of our overall business strategy.
- We achieve good safety performance through planning, training, consultation, supervision and responsibility.
- We comply with applicable legislations, standards and other requirements associated within our industry and region.

We will create a working environment characterised by a commitment to our safety objective, safe behaviours and practices, and continual improvement. In this way we can work together so that our goal of Zero Harm is achieved.

This policy statement is our personal commitment and that of Qatar Rail leadership team, their teams and contractors to provide a positive Safety culture and our goal of Zero Harm in all our activities.

Abdulla Al Subaie
