

The Railway is one of the most sustainable modes of transport.

Qatar Rail's Sustainability Policy provides our goals and basic principles to ensure a sustainable operation.

## OUR GOALS

- That our rail assets will meet the economic, environmental, social and cultural needs of this generation without compromising the ability of future generations from meeting their needs.
- Ensuring that the interdependent principles of sustainability are meaningfully integrated into all tools and processes used during the full life cycle of our projects and activities, including design, construction, operation, maintenance and decommissioning.
- Ensuring that our rail assets will achieve GSAS Operations and compliance to ISO 50001:2018 and ISO 14090:2019 standards.

## BASIC PRINCIPLES

We will achieve our goals by undertaking the following:

- Identifying and managing effectively, the hazards, risks and opportunities in delivery of our sustainability and Zero Harm with our staff and partners.
- Raising awareness to promote preservation and rehabilitation of the natural and built environments, and the natural resources upon which both depend, such as water, air and the land.
- Achieving a no-net-loss or net positive impact on natural biodiversity for all levels of ecosystem organisation, including species, populations and communities at the local, regional, national and international scales, as appropriate and feasible.
- Identifying and implementing measures to minimize the carbon footprint of the railway system during the design, build, commissioning, operation and decommissioning stages, and to maximise its contribution to advancing the carbon reduction and climate change adaption goals of the country and the region, spanning a broad array of themes, including "green infrastructure", energy conservation, greenhouse gas reduction and traffic management.
- Acknowledging and respecting the Qatar national identity by nurturing its history, traditions, and values that are embedded in the local culture, family structure and future generations and expectations.
- Supporting socially and environmentally sustainable economic growth and diversification by reducing capital costs, increasing land values, fostering healthy competitiveness, encouraging business investment, and stimulating innovation.
- Promoting optimal social, cultural and economic accessibility, connectivity and interaction of people, institutions and businesses in Qatar, through means such as education, technology and systems.

We will create a working environment characterised by a commitment to our sustainability objectives, behaviours and practices, and continual improvement. In this way we can work together so that our goal of sustainable development is achieved.

This policy statement is our personal commitment and that of Qatar Rail leadership team, their teams and contractors to provide a positive Sustainable culture and our goal of sustainable development in all our activities.
